Ng Jian Hwa

Full Stack Web Developer

Edwin Ng @notedwin-dev notedwin.codes@gmail.com

+60 12 488 6612 Kuala Lumpur, Malaysia https://notedwin.dev

Profile

I am a Full Stack Web Developer based in Kuala Lumpur with extensive experience in building scalable web applications. I thrive on collaborating with teams, mentoring junior developers, and delivering high-quality, production-ready features. My technical expertise includes TypeScript, Node.js, and overall system architecture. I am passionate about improving user experiences through efficient coding and project management.

Professional Experience

01/2026 – 04/2026
Petaling Jaya, Malaysia

Backend Developer Intern
Versa Asia Sdn. bhd.

- Enhanced backend logic for an existing stuck transaction detection system by analyzing transaction lifecycle flows and implementing additional detection rules for previously unidentified transaction scenarios requiring manual investigation.
- Collaborated with the CTO and Marketing team to rapidly develop a custom campaign submission platform using Next.js, implementing the frontend user interface and integrating with backend services for automated response collection.
- Developed backend improvements, unit tests, and production-safe scripts while participating in code reviews and system improvement initiatives within a fintech environment.
- Researched and prototyped a Money-Weighted Rate of Return (MWRR) calculation engine, evaluating industry-standard numerical approaches and designing data structures required to support portfolio performance analysis across investment products.
- Collaborated with engineering and operational stakeholders to analyze requirements, investigate system behavior, and deliver solutions through iterative development and feedback cycles.

10/2024 – 02/2025
Kuala Lumpur, Malaysia

Full Stack Developer - Full Time Contract
SuDu AI (formerly A Serious Company)

- **Led 1 of 3 development teams** in building **SuDu.AI v2**, an **AI-powered ERP system** integrated with **SQL Accounting Software**.
- Refactored 20 backend modules (175 files) from JavaScript to **TypeScript using MVC architecture**, improving maintainability, code structure, and performance.
- Collaborated closely with product and business teams to evaluate feature feasibility, design database schemas, and define scalable system architecture.
- Established coding standards and **mentored interns and junior developers**, **increasing team productivity by 20%**.

Tech Stack: Vue.js, TailwindCSS, JavaScript, TypeScript, Express.js, Prisma ORM, PostgreSQL, Redis, Docker, AWS Lightsail, AWS S3, Git

07/2024 – 10/2024
Kuala Lumpur, Malaysia

Full Stack Web Developer - Intern
SuDu AI (formerly A Serious Company)

- Participated in migrating prototype version to production-ready **SuDu.AI v1**, a **standard modularised ERP system.**
- Collaborated with developers and QA tester to **resolve 227 bugs before V1 release.**
- **Led 1 of 3 teams**, recognised for strong technical performance and leadership potential.
- **Implemented caching system and optimised API calls**, **reducing page load time** by **90%** and accelerating **large API response speed from 3s to 225ms.**
- Developed **Progressive Web App (PWA)** version in collaboration with the **UI/UX Designer** and **Business Analyst**.

Tech Stack: Vue.js, TypeScript, Express.js, Prisma ORM, PostgreSQL, Redis, TailwindCSS, Git

04/2024 – 07/2024
Kuala Lumpur, Malaysia

Full Stack Web Developer - Part Time
SuDu AI (formerly A Serious Company)
Developed and deployed the frontend using **Vue.js** and **Bootstrap**, and implemented backend services with **Node.js** and **Express.js** for **two core ERP modules**, in close collaboration with senior developers and business analysts to ensure system reliability and functional completeness.

Skills

Programming Languages: JavaScript, TypeScript, Python, Java, PHP

Development Tools: Git, ESLint

Frontend: HTML, CSS, JavaScript, React, Next.js, Vue.js, TailwindCSS

Backend: Node, Express, Prisma, Django

Database: MySQL, PostgreSQL, MongoDB, Redis

Cloud & DevOps: Docker, AWS (S3, EC2, Lightsail)

Education

02/2025 – 2027

Degree in Software Engineering
Asia Pacific University of Technology and Innovation

07/2022 – 07/2024

Diploma in ICT with specialism in Software Engineering
Asia Pacific University of Technology and Innovation

Projects

01/2026 – Present

ZenFinance - Personal Finance Tracker
Developer

- Developed a **Full Stack Personal Finance Tracker web app with PWA support** using **Next.js, TailwindCSS, TypeScript, Google Sheets and Shadcn UI.**
- Implemented **Google Sheets as a user-owned database**, reducing backend storage dependency and enabling **full user data ownership.**
- **Integrated Google Gemini** with **permission-based tool system**, enabling AI-powered transaction analysis while **enforcing explicit user approval for data access**

- Developed **AI-powered bank statement parsing**, reducing **manual transaction entry time from 2 hours to 30 seconds (~99.6% reduction)**
- Designed financial tracking modules (accounts, transactions, budgets, savings, goals), supporting **multi-account aggregation and real-time balance updates**
- Created dashboards with data visualization for income vs expenses and monthly summaries, improving financial visibility with **instant calculations across datasets**
- Integrated geolocation with OpenStreetMap API to provide nearby recommendations within **3 seconds**
- Enabled configurable AI usage with user-provided API keys, reducing system dependency on shared quotas and improving **scalability for multiple users**

02/2024 – 03/2026 **Miss Valentina - BDSM Role-playing Discord Bot**

Freelance Developer

- **System Migration: Architected and rebuilt** a Discord bot with 120+ commands, migrating the codebase from Python to **Node.js** to improve performance and scalability.
- **Growth & Scaling: Scaled user adoption by 185%**, growing the bot from 1,012 to 2,887+ servers through strategic partnerships and community engagement.
- **Custom AI Personas: Integrated Google Gemini AI** to provide highly customizable, persona-based LLM interactions with support for group chat and self-uploaded prompt text files.
- **Hardware Integration: Developed a real-time hardware integration** using the **Lovense API**, enabling remote device control via secure, consent-based Slash Commands.
- **Feature Engineering: Developed "Vibepool,"** a cross-server synchronization feature allowing anonymous user participation and centralized remote control across disparate Discord communities.

09/2023 – 12/2024 **DevOverflow**

Full Stack Web Developer

- Developed a **full-stack web application** inspired by Stack Overflow using **Next.js 13**, **MongoDB**, **TailwindCSS**, **TypeScript**, and **Redux**.
- Implemented **authentication and user management** via **Clerk**, alongside a **recommendation system**, **badge & reputation system**, **views and voting mechanisms**, and **advanced filtering with pagination**.
- Achieved a **Google Lighthouse score** of **99% performance**, **100% SEO**, **97% accessibility**, and **93% best practices** through systematic site optimization.

11/2023 – 01/2024 **APHub: a Quiz and Social Media Website**

Full Stack Web Developer

- Designed the **wireframes and UI layout** of APHub using **Figma**, ensuring a user-friendly and consistent interface.
- Implemented the **authentication system** and backend logic using **PHP**, with **HTML, CSS, and JavaScript** for client-side functionality.
- **Led a team of 4 developers**, managing project timelines, assigning tasks, and ensuring timely delivery of milestones.
- Debugged and resolved syntax and runtime issues, improving system stability before final submission.
- Authored detailed **technical documentation and inline code comments** to enhance code readability and team collaboration.

Mentorship

06/2026 – 10/2026
SMK(P) Pudu,
Kuala Lumpur

Coding Bootcamp Organizer & Mentor
SMK(P) Pudu, Kuala Lumpur
- Orgnanized and conducted **Full Stack Web Development Course** for **28 students** at **SMK(P) Pudu**

08/2021 – 2024
Remote

Staff-picked Community Hero
Autocode Discord Community (45K+ members)
- Provided **volunteer mentorship and technical support** to **over 500 developers**, assisting an average of **20 community members daily** in a global community of **45,000+ developers**.
- Recognized by Autocode staff for **outstanding community engagement**, **problem-solving ability**, and **technical leadership**.
- Contributed **open-source templates and code snippets** for **Discord bot development**, accumulating **10,000+ installs** on the Autocode platform.

Awards

Top 6 Finalists
Young Founders Summit Asia 2021
2021
IncluNation envisions to reduce Gender Inequality in workspace by promoting awareness via game story progression.

1st Runner Up
Digital Ninjas Accelerator Lab X 2020 by MDEC
2020
HyPure, a self-purifying water bottle with UV-sensor and self-heating elements.

Silver Award
STEM Design Asia Competition 2019 by SAM Labs
2019
SRB - Smart Road Barricades Solution aims to resolve traffic issues by integrating with Traffic Light system, Flood Alert System, and Night markets

Speaking Languages

English **Chinese** **Cantonese** **Malay**

Certificates

Great Malaysia AI Hackathon 2025 (By AWS, MDEC & APU)

FutureHack AI Hackathon 2025 (By FutureHack, APU & Taylors University)

The Basics of Google Cloud Compute (By Google Cloud)

Prompt Design in Vertex AI (By Google Cloud)

Cloud Speech API: 3 Ways (By Google Cloud)
